The problem with stereotypes is not that they are untrue, but that they are incomplete.

They make one story become the only story.

# STUDY SKILLS

- **Use [scholar.google.com](https://scholar.google.com) instead of [google.com](https://google.com) for essays or research.**
- **Keep a water bottle and a mini chocolate bar with you. In case you feel dehydrated or need to boost the concentration level.**
- **Make neat notes during the lecture or while studying to avoid difficulty in revising or recalling the content.**
- **Write essential points or information in the form of tables.**
- **Before taking a break between learning, make a quick to-do list and write the essential points covered after the break.**
- **Some of you have a bad habit of checking your phones after a minute or so. To beat this distraction while studying, make use of the Keep Me Out website or app. It will lock apps like Snapchat, Instagram, YouTube, or Facebook for the number of minutes you want.**
- **Got a 2000+ word assignment for the coming week? Start writing 400 to 500 words daily instead of writing all in one day. It will make the task much more manageable.**
- **Before submitting your essay assignment, copy-paste the complete essay on Google translate and listen to your writing**
